

CAREER PROFILE

My name is Kiyatoli Abduljelil. I have recently graduated in Computer Science from Mattu University. I am a technology enthusiast with a passion for working on real-world environments. I designed a web-based Ethiopian Postal Service System as my final year project, gaining first-hand experience in creating efficient and easy-to-use software. I also underwent an apprenticeship in Oromia Broadcasting Network for approximately 2 months and 15 days, during which I shaped my technical capacity and teamwork spirit. I am now seeking new opportunities to grow professionally and engage in impactful technology projects.

EXPERIENCES

Apprentice (IT Support & Media Technology)

2024 (2 months and 15 days)

Oromia Broadcasting Network

completed an apprenticeship with Oromia Broadcasting Network where I assisted the IT and media production departments. My responsibilities included basic hardware and software system troubleshooting, digital content workflow coordination, and aid in media broadcasting equipment. I had hands-on experience with the application of technology in aiding mass communication and developed teamwork and communication skills in a fast-paced environment.

Graphic Designer (Photoshop & Illustrator)

2019 - 2022

Mesaso Studio

I conceptualized numerous creative works at Mesaso Studio using Adobe Illustrator and Photoshop. I created promotional banners, digital artwork, and cartoonish work for social media, advertisements, and prints. This role improved my visual communication abilities and further improved my color theory, composition, and client-centric design protocols expertise..

Freelance Front-End Developer

2024 – Present

Remote / Contract-Based

As a freelance coder, I developed mini-projects of web development, focusing on front-end style and responsiveness. I did a project named balemountainshikingtours.com, which is a tourism website for marketing hiking tours in the Bale Mountains. Layout design, incorporation of content, and performance optimization were my tasks. On freelance work, my HTML, CSS, and JavaScript skills were boosted, while my awareness of client requirements and project releases increased.

PROJECTS

Ethiopian Postal Service System - A web-based information system developed as a final year project to enhance and digitize the services of the Ethiopian Postal Service.

Bale Mountains Hiking Tours - A front-end website created for a local tourism service, featuring responsive design, destination highlights, and trip information.

SKILLS & PROFICIENCY
